

1. **I am using an EDC-ISA card reader with Windows 2000 and every time I put an SRAM or Linear Flash card in the reader I can't read the card. Do I need new drivers for my card reader?**
  - a. In Windows 2000, SRAM and Linear Flash cards require drivers for the cards themselves. To find out how to install drivers please check out our technical support site under the SRAM or Linear Flash section.
